### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Makuch, Reg. No. 32,263 on 9/27/2004.

2. The application has been amended as follows:

In abstract

Please substitute the abstract as follows:

A resource reservation management apparatus that manages equipment resources connected to an AV network includes an EPG processing device for acquiring starting/ending time information of a broadcast program from an EPG (electronic program guide) superimposed on a broadcast wave, a frequency band information processing device for acquiring frequency band information of the program from the EPG, a frequency band information processing device for time managing an AV network frequency band resource reservation management table, a controller, and a communication interface using an allocated secured frequency band at the start time of the reserved program. Upon receiving a reservation request, the controller acquires the frequency band at the starting/ending time information of the reserved program and, with reference to the table, determines whether the frequency band of the reserved program can be allocated so that, when the band can be allocated, reservation of the band is registered in the table.

***REASONS FOR ALLOWANCE***

3. The following is an examiner's statement of reasons for allowance: The claimed invention provides novel use of resources reservation management apparatus that manages equipment resources connected to the audio-video network. The apparatus includes frequency band (bit rate) resource management means for performing time management of the frequency band (bit rate) resource of the audio-video network by using a resource reservation management table. The use of the resources reservation management apparatus results in more efficient for bandwidth usage to allocate the total available bandwidth dynamically among a number of variable bit rate audio-video services, which is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jungwon Chang whose telephone number is (703)305-9669. The examiner can normally be reached on 9:30-6:00 (Monday-Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A Follansbee can be reached on (703)305-8498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
